CONCLUSION

The one-week workshop was a great learning experience for me. During this workshop, I learned how to create websites using AI website builders, develop chatbots, and write effective prompts to get better results from AI tools. I gained practical experience using platforms like Lovable, Dify, and ChatGPT. I also learned how to integrate a chatbot into a website and make it more interactive and useful for users. This workshop helped me improve my creativity, problem-solving skills, and technical knowledge. As a beginner, I gained confidence in using AI tools and understood how they can make our work easier and faster. Overall, this workshop was very informative and helped me take my first step into the world of website development, chatbot creation, and artificial intelligence.
